

FCC,I understand you are trying to place limits on XM's ability to provide me with local weather and traffic. Please DON'T do this. XM is extremely valuable to me as an over-the-road trucker. I only wish they could provide me with more city's information. Maybe they will, once you reject NAB's petition 04-160. Last week I noticed an Amber Alert for the Tampa/Orlando area. Even though I wasn't in the area, I began looking for the car they described. XM provides me with instant information. It is nice to know about weather and traffic conditions in city before I get there, so I'm able to make critical decisions about which route I should take. I pay for this information. Please protect my ability to receive it.
